PROFILE SUMMARY

Results-driven Software Engineer (5 years) specializing in backend/full-stack development with Java, Spring Boot, Python, and AWS. Experienced in scalable microservices, DevOps automation, and Generative AI integration. Expert in LLMs, agentic models, and prompt engineering — cutting multi-day dev tasks into hours and boosting efficiency by 90%.

EXPERIENCE

Software Development Engineer I

June 2021 – Present

Publicis Sapient

Bengaluru, India

- **Omantel (Telecom Service Provider – Oman)**

- * Launched a custom SAML adapter bridging Omantel's LDAP with AWS Cognito, modernizing auth and reducing WebSphere dependency by 70%.
- * Boosted BFF performance by 3–5x via AWS ElastiCache and DynamoDB migration, enabling faster page loads at scale.
- * Pioneered AI-assisted development using LLMs and agentic models, slashing 3–4 day tasks into hours and cutting dev effort by 90%.
- * Delivered a centralized real-time notification system, increasing re-engagement by over 40%.
- * Redesigned login with Google/Apple sign-in, improving UX and reducing auth friction by 60%.
- * Mentored 5+ new engineers, accelerating onboarding and improving team velocity by 25%.

- **PTT t-ecosys (B2B platform):**

- * Built scalable cloud infra via Terraform (API Gateway, EKS), improving reliability and security posture.
- * Secured MongoDB access through private VPC endpoints, enhancing compliance and safety.

- **Robinhood App (SCB, B2C SuperApp – Thailand):**

- * Built flight booking modules generating 3M+ baht in campaign sales.
- * Designed Spring Boot microservices with Kafka, meeting sub-second SLAs under load.

EDUCATION

Indian Institute of Technology, Bhubaneswar

Khordha, Odisha

B.Tech (Honors) in Electronics and Communication Engineering CGPA: 8.56/10

Jul 2017 – May 2021

SKILLS

Languages: Java, Python, C++, SQL, JavaScript, TypeScript

Frameworks: Spring Boot, React, Node.js, Flask, WebFlux, Selenium

Cloud & DevOps: AWS (Lambda, Cognito, DynamoDB, EKS), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

AI: OpenAI APIs, LangChain, Prompt Engineering, LLM Ops, Agentic Workflows

Soft Skills: Problem Solving, Teamwork, Communication, Agile

PROJECTS

CuReM – Customer Retention Model (Hackathon Winner) | *LangFlow, FastAPI, AWS, OpenAI, XGBoost*

2024

- Built a multi-agent AI workflow predicting churn, bundling personalized offers, and scheduling omni-channel outreach with full traceability.
- Designed 3-layer architecture — deterministic ML/rules (L1), LLM reasoning/copy (L2), and policy-based scheduling (L3) with guardrails for consent, confidence, and discount caps.
- Won **1st place** in company-wide hackathon for measurable retention uplift and hybrid AI design.

CloakVPN – Personal Cloud VPN Orchestrator | *Python, Terraform, AWS EC2, Tkinter*

2024

- Developed a one-click desktop app to spin up/tear down VPN servers across AWS regions with real-time latency metrics.
- Reduced cost to \$0.004/hr per instance — 97% cheaper than commercial VPNs. [GitHub](#) | [Article](#)

Highly Scalable URL Shortener | *AWS Lambda, MongoDB*

2024

- Serverless shortener with collision-free key generation and sub-ms redirects, deployed globally via Lambda@Edge. [Website](#) | [GitHub](#)

CERTIFICATIONS

AWS Certified Solutions Architect: Associate Level | [Certificate](#) | [Badge](#)

Vault Fundamentals by Thought Machine: Credential ID 68637848 (Issued: Feb 2023)
